

## Company Profile- E.S. Embedded Solutions 3000 LTD. (E.S.)

## 10 facts about the company:

- 4. 90% of E.S. team composed of engineers, mathematicians, Ph.D. and algorithm developers
- 5. E.S. core technology originated to the Israeli forces
- 6. Patented technology for time-critical & mission critical communication including network security

- 8. Certified exporter by the Israeli ministry of economy and commerce
- 9. Awarded by the enterprise cybersecurity magazine as one of the top 10 Cybersecurity companies in the middle east on 2020

## 10 facts about the technology:

The company invented a combined hardware and software products that secure organizations in the following sectors: Banks, Defense, Government, Energy, Automation, Industrial facilities, Finance, IoT, Cloud computing, Aviation and more form various cyber-attacks.

Company's leading product is BitNetSentry (BNS), it designed with the following approach:

- 1. BNS is Invisible in the network (no MAC nor IP address). Hackers can't target nor bypass BNS.
- 2. BNS is utilizing the WBC (White Box Cryptography) standard- a proprietary crypto method that offers zero trust secured communication even from insiders and those who got encryption passwords.
- 3. Hassle free migration, installation and managing
- 4. BNS enables bi-directional secured SCADA communication.
- 5. Thwarting of "rogue insiders", even when they have IT privileges, passwords and encryption keys.
- 6. BNS ensures that critical and sensitive information will not: Leak out, breach, get stolen or change illegally or maliciously.
- 7. BNS is market leader in Bit-level security (@Data Link Layer).
- 8. BNS adds extremely low latency (few Nano seconds)
- 9. BNS enables Traffic (headers & content) manipulation, redirection, blocking.
- 10. BNS secures against legal commands sent from legal sender but with malicious abnormal or illegal behavior
